A. JOHN BRITTO

Senior Technical Lead | Senior Frontend Engineer | Angular | TypeScript | AWS

Chennai, Tamil Nadu, India | jbrittoit1@gmail.com | LinkedIn: linkedin.com/in/john-britto-arockiyadoss-94a626155 | Portfolio: https://jbrittoit.github.io/portfolio/

PROFESSIONAL SUMMARY

Senior Technical Lead / Frontend Engineer with 9+ years of experience building enterprise web and mobile products, specializing in Angular, TypeScript, JavaScript, frontend architecture, REST API integration, AWS and Google Maps. Currently the primary frontend technical owner for the Fleetpaths transportation platform, responsible for architecture, development, code reviews, mentoring, client collaboration, production support and AWS deployments.

Experienced in fleet management, transportation, route operations, vehicle tracking, driver applications, parent portals, geospatial workflows and enterprise SaaS products. Hands-on with Angular modernization, frontend performance optimization, Cognito authentication, NgRx, Google Maps APIs and AWS S3/CloudFront/API Gateway.

TECHNICAL SKILLS

- Frontend: Angular, TypeScript, JavaScript, RxJS, NgRx, Angular Material, PrimeNG, Bootstrap, HTML5, CSS, Reactive Forms, Lazy Loading, Modular Architecture
- Cloud/AWS: AWS S3, CloudFront, Cognito, API Gateway, AWS CLI, AWS Lambda integration, AWS SDK
- Maps: Google Maps JavaScript API, Directions, Places, Geometry, Geocoding, Reverse Geocoding, Marker Clustering, Waypoint Optimization
- Mobile: React Native, Redux, Redux Thunk, Kotlin, Android, Jetpack Compose, Fused Location
- Integration: REST APIs, JSON, JWT, API Integration
- Testing/Tools: Angular CLI, Git, Jasmine, Karma, Protractor, npm, Ubuntu

SAKSOFT — Technical Lead | Apr 2023 – Present | Chennai

- Serve as the primary and only frontend technical owner for the Fleetpaths transportation platform, owning frontend architecture, design, development and technical decisions.
- Lead frontend engineering across 6 applications: SP-Ui, Concierge, parentsite, conciergeinfo, HeritageRideManager and SunyCardReader.
- Build enterprise Angular applications using Angular, TypeScript, RxJS, NgRx, Angular Material, PrimeNG and REST APIs.
- Support a transportation platform serving approximately 155 organizations, 10,000+ vehicles, 10,000+ drivers, 3,000+ users and 1,000+ routes.
- Develop fleet, vehicle, route, stop, reporting, alert, user, driver, parent and transportation-operation workflows.
- Integrate Google Maps Directions, Places, Geometry, marker clustering and waypoint optimization for route visualization and transportation workflows.
- Own frontend code reviews, technical task assignment, mentoring and knowledge transfer for junior/full-stack developers.
- Work directly with US/client stakeholders through Scrum to understand requirements and deliver frontend solutions.
- Personally deploy Fleetpaths applications to AWS S3 across DEV and Production using AWS CLI on Ubuntu; production deployment is typically a few-minute operation after DEV validation and client confirmation.
- Led frontend changes for the MySQL-to-PostgreSQL transition, updating API response/key mappings and validating frontend integration against PostgreSQL-backed services.
- Achieved approximately 3× performance improvement through Angular code restructuring, modularization, lazy loading, removal of unwanted code/blocks and addressing memory leaks.
- Conducted POCs for Angular 19, Angular 20, standalone components and Angular Material 19 to evaluate modernization opportunities.
- Conducted a POC for migrating Google Maps integration away from AGM, including markers, layers and directions.
- Refactored legacy Angular application structure to support white-label requirements.
- Participate in production support, release coordination and technical troubleshooting.

TERAFast Networks Pvt Ltd — Frontend Developer | Apr 2017 – Apr 2023 | Greater Chennai Area

- Developed enterprise web and mobile applications using Angular, TypeScript, JavaScript and React Native.
- Built REST API-integrated applications across transportation, healthcare, RPA, government and enterprise domains.
- Developed Tera UI, an RPA product administration interface for workflows including school and institute admissions.
- Developed DAP, a React Native government-scheme application supporting disabled-person registration and allocation workflows.
- Developed Gitattv2, a React Native selfie-based attendance application using camera integration.
- Developed YouSync UI, an Angular 9 administration dashboard for organization user management.
- Contributed to Cloud DICOM, an enterprise medical-imaging platform involving Angular, Spring Boot, MongoDB, AWS, Kafka and Docker.
- Developed healthcare application functionality using React Native, TypeScript, Redux, Redux Thunk, Axios and React Native Navigation.

CHENNAI RADHA ENGINEERING WORKS PRIVATE LIMITED — Administration | Apr 2013 – Apr 2016 | India

- System and office administration responsibilities supporting day-to-day organizational operations.

EDUCATION

- Annamalai University — Master's Degree, Computer and Information Sciences and Support Services | 2007–2012

TARGET ROLES

- Senior Frontend Engineer | Senior Angular Developer | Frontend Technical Lead | Angular Technical Lead | Lead Software Engineer – Frontend | Senior Software Engineer – Angular
